

TEXAS DRONE PROGRAM

Our NEW "A" rated program offers insurance coverage for unmanned aircraft to cover your clients in the event of physical damage to your Unmanned Aircraft System (UAS) and for liability coverage in the event of loss of bodily injury or property damage to others.

The drones/UASs must be controlled by a ground control system through the use of an on-board computer and communication link operated by a pilot on the ground. The drone/UAS must be operated within FAA guidelines.

Please call us for additional submission requirements.
